Trans. of Voprosy Meditsinskoi Khimii (USSR) 1962,
v. 8, no. 3, p. 276-279.

DESCRIPTORS: Purification, Separation, *Clostridium
perfringens, *Toxins and antitoxins, Sodium compounds,
Phosphates, Bacterial toxins, Antigens.

A study was made of the effect of the pH and temper-
ature on purification of Clostridium perfringens toxin
by sodium hexametaphosphate. The highest yield of
antigen and the greatest specific activity were obtained
when the toxin was acidified to pH 3.2 at 3°C and the
precipitate separated 30 minutes after acidification.

Khaykin, A. B. and Shumpf, Ye. P.
SYSTEMS FOR AUTOMATIC REGULATION OF
CONTROLLABLE PITCH PROPELLER INSTALLA-
TIONS, tr. by Bernard M. Kassell. Mar 61 [19]p.
Bureau of Ships Trans. no. 743.
Order from LC or SLA mi\$2.40, ph\$3.30 61-19133

Trans. of Sudostroyeniye (USSR) 1960, v. 26, no. 10,
p. 18-24.

Two systems for the automatic regulation of control-
lable pitch propellers are described that were tested
under operating conditions on a Russian tug. In one
system the pitch-control mechanism is regulated by a
tachometer generator. In the other system regulation
is in accord with the temperature of the exhaust gases
of the diesel engine. Both regulators were reliable in
operation, easy to service, and small in weight and
size. Both systems improved the economics of opera-
tion and the working conditions for personnel on watch.
